### 3. About Watch Club

We're [Watch Club](#): a new streaming and social media platform for young people to watch and talk about original shows. Read more about us on [Deadline](#) and [TechCrunch](#).

We produce stories that feel grounded, emotionally-specific, and worth talking about. We really care about capturing an authentic picture of what it's like to grow up in Hawaii, so we're working with locals from Hawaii in front of and behind the camera.

### 4. About SKAM

Our show is inspired by SKAM, a Norwegian series that is one of Europe's most popular teen tv shows.

SKAM follows 5 women in high school. It's a show about how they become friends, how each of them is hiding a secret shame, and how they come to rely on and support each other as they confront their biggest fears. Each season stars a different character from the same friend group. Themes = identity, mental health, religion, sexuality, and relationships.

SKAM's revolutionary format released clips in real-time throughout the week as events "happened," with characters maintaining active social media accounts, creating an immersive experience that made viewers feel like they were living alongside the characters rather than watching a traditional show.

The series' authenticity and innovative storytelling garnered 8+ international remakes and a global fan community.

Our goal is to make a story that honors the realism and positive themes of SKAM, and to do it for an audience of young people growing up in Hawaii.
